Please Note: These illustrations are for a healthy male. The above are illustrative maturity values net of all charges, service tax and levies. The illustration is presented with 2 different assumed rates of future returns. The returns shown in the benefit illustration are not guaranteed and they are not the upper or lower limits of what you might get back, as the value of your policy depends on a number of factors including future investment performance.

The premiums paid by you are allocated to an investment account created under your policy.

This premium minus applicable charges, is used to buy units in your chosen funds, in the proportions specified by you.

Plus your investment account is also credited with guaranteed loyalty additions at the end of the 10th policy year and every 5 years thereafter till the end of policy term.

The fund value of your investment account reflects the wealth built over time basis your premium contribution, guaranteed loyalty additions and returns accrued from the investment options chosen.

Your investment account is also used to pay charges associated with your policy. For this sufficient units are cancelled to meet the amount of the payments due. If units are held in more than one unit linked fund, then proportionate units in each fund are cancelled to meet the amount of the payment. For partial withdrawals, units are cancelled from the unit linked funds specified by the policy owner.

The fund value on any given date will be equal to the number of units in that fund X NAV of the fund as on that date.

Systematic Allocator facility: This tool is specially designed to cater to the key needs of balancing growth and safety on investments. As your Wealth Gain nears maturity, it becomes essential to ensure the wealth accumulated over the years is not risked by some sudden drop due to the unfortunate market fluctuations.

Systematic Allocator is a programmed investment solution in which the fund mix becomes more conservative (i.e. more debt-oriented with an attempt to reduce the risk of loss) as the investment goal comes closer to fulfillment.

As per this strategy, your funds will be proportionately invested in Equity Growth Fund (a high risk fund) and Income Fund (a low risk fund) based on the balance time to maturity of your plan (end of your policy term). As your plan approaches maturity, funds will be proportionately allocated to the Income Fund from the Equity Growth Fund. By reducing the investment in Equity Growth Fund, the

risk of a sudden drop in the equity market affecting your accumulated fund value reduces.

Balance time to maturity (in years, rounded up to the nearest integer) of your plan is used to determine the proportion of allocation to the Equity Growth Fund and the Income Fund. This proportion is pre-defined by the Systemic Allocator "Glide Path". It is the proportion allocated to the Equity Growth Fund and Income Fund based on the time remaining for the plan to attain maturity as shown in the table below, the premiums will be allocated and the Fund Value will be rebalanced at each policy anniversary as per Glide Path:

Balance time for the plan to attain maturity(in years)	Balance time for the plan to attain maturity(in years)	Balance time for the plan to attain maturity(in years)
1	5.00%	95.00%
2	10.00%	90.00%
3	15.00%	85.00%
4	20.00%	80.00%
5	25.00%	75.00%
6	30.00%	70.00%
7	35.00%	65.00%
8	45.00%	55.00%
9	50.00%	50.00%
10	55.00%	45.00%
11	60.00%	40.00%
12	65.00%	35.00%
13	70.00%	30.00%
14	75.00%	25.00%
15 and above	80.00%	20.00%

You may choose the Systematic Allocator facility at the time of policy purchase. Alternately, you may also switch to this option on any policy anniversary. Once you have chosen the Systematic Allocator, you will not be allowed to manually switch or redirect your premiums between the investment funds. However, you may switch back to the 'Do-it-yourself' strategy at anytime during the plan term.

There are no additional charges for the Systematic Allocator facility. However, the underlying fund management charges applicable to the Equity Growth Fund and Income Funds will apply.

Minimum allocation to a fund:

The minimum amount of premium allocated to any investment fund should be at least 15% of the annual premium.

Unit price (Net Asset Value) formula:

The Net Asset Value (NAV) is determined using the market value of assets in accordance with regulatory requirements.

Net Asset Value (NAV) =

(Market value of investments held by the fund
+ value of current assets – value
of current liabilities and provisions if any)

Number of units existing on valuation date before
creation/redemption of units

The NAV calculated as per the above formula shall be declared on our website daily in accordance with IRDAI regulations.

Applicable NAV:

New business premiums will be allocated units at the NAV applicable on the date of commencement of the policy after completion of the proposal.

Switches in investment fund(s) or renewal premiums received up to the cut-off time at the company's designated offices through local cheque or demand draft payable at par at the location the premium is received will be allocated units basis the same day's NAV. If received after the cut-off time, the units will be allocated basis the next business day's NAV.

Renewal premiums paid through outstation cheques or outstation demand drafts will be allocated units as per the NAV on the business day of realisation of the cheques or demand drafts. In case you pay your renewal premiums in advance, the units will be allocated as per the NAV prevailing on the due date of the premium due.

In case of cancellation of units for charges and valid notification and instructions received at the company's designated offices for switches, partial withdrawals, surrenders and death claims, the same day's NAV is applicable if the request is received before the cut-off time. Else, the request will be processed at the next business day's NAV. The cut-off time is as per the IRDAI guidelines, which, at present is 3.00 pm.

Account Statement:

We will send you the account statement every year at the policy anniversary.

New funds:

IDBI Federal will introduce new funds, from time to time, to meet changing needs of investors, market conditions and regulatory environment. Such new funds shall also be made available to our existing customers. We may also modify the existing funds subject to IRDAI approval. Similarly, old funds may be withdrawn or merged.

Charges associated with the plan:

Premium Allocation Charge:

The premium allocation charge is deducted from the premium paid and the balance is invested in investment options chosen by the policy owner.

Premium allocation charges as a percentage of premiums are given below:

Allocation Charge (% of Premium)	
Policy Year	Charge (Per annum)
1	3.00%
2-5	1.50%
6+	1.00%

Policy Administration Charge:

Mortality Charges:

At the beginning of each policy month we will calculate the mortality charges for the policy. The mortality charge is 1/12th of the mortality rates for the age as on last birthday, at the time of deduction of the mortality charge, multiplied by the sum at risk divided by one thousand. The sum at risk, if any, is the amount by which the death benefit exceeds the fund value.

If the total fund value including guaranteed loyalty addition is higher than the death benefit then the sum at risk will be nil and we will not deduct any mortality charge.

We will deduct the mortality charge from the fund value by cancelling units.

Mortality charges (excluding service tax, cess) for sample ages of a healthy male are as tabulated below:

Age	Rate	Age	Rate	Age	Rate
20	0.94	30	1.11	40	1.96

Advantage Women: A woman life insured gets additional discount on mortality charges

Waiver of premium on **disability charge**

At the beginning of each policy month we will calculate the disability charges for the policy. The monthly disability charge is 1/12th of the disability rates for the age as on last birthday, at the time of deduction of the charge, multiplied by the sum at risk divided by one thousand. The sum at risk, if any, is equivalent to the amount of outstanding future premiums payable in the plan. We will also deduct service tax, surcharges, cess and any other levies applicable to the Disability Charge from the fund. After the end of PPT, no Disability charge will be levied. If the Disability is triggered and premiums are being paid by the company, no further disability charge will be deducted from the policy.

The sample disability rates for a health male are as under.

Settlement Option:

Under this option you can choose to withdraw your maturity benefit in installments within a maximum period of 5 years from the maturity date instead of redeeming the entire amount on the maturity date itself. The first installment will be paid at the end of one year after maturity. During these 5 years, your fund value will continue to participate in the performance of the unit-linked funds chosen by you and will also bear the associated risk. In case the policy owner has opted for the Systematic Allocator, the funds remain invested as at maturity and there will be no further rebalancing. Also no other charges shall be levied and no Guaranteed Loyalty Additions shall be added during this period. We will continue to deduct the applicable charges for fund management. No switching or partial withdrawals are allowed during this period. Life insurance benefits are also not applicable during the settlement period, and in case of death of the life insured only the available fund value will be paid out to the beneficiary.

You may opt for a settlement option at least 3 months prior to your policy maturity date. This is an ideal option to offset any market related risks at the time of policy maturity; or to remain invested in a bullish market; or to avoid careless squandering of your lump sum wealth.

You may choose from any of the settlement options listed below:

Choice of Settlement period (in years)	Instalment paid				
	(expressed as a percentage of Fund Value available at the end of each year during settlement period)				
	Year 1	Year 2	Year 3	Year 4	Year 5
2	50%	100%	---	---	---
3	33%	50%	100%	---	---
4	25%	33%	50%	100%	---
5	20%	25%	33%	50%	100%

Non-forfeiture options:

Discontinuing premiums after completion of 5 policy years

After payment of all due premiums in the first five policy years, if you – the policy owner, fail to pay premium within the grace period of fifteen days for policies with monthly mode and thirty days for policies with annual mode, we will send a notice within a period of fifteen days from the date of expiry of the grace period. You are entitled to exercise within a period of thirty days from the receipt of such notice, the following options:

1. Revive the policy within a period of two years: We offer a revival period of two years from the date of discontinuance of premium. During this period, the policy is deemed to be in force with risk cover as per terms and conditions of the policy. If the policy owner exercises the option to revive the policy by payment of due premiums within the revival period, the insurance benefits along with the investment made in the segregated funds less applicable charges shall be continued, subject to our underwriting guidelines.
2. Complete withdrawal from the policy without any risk cover: If you choose to exercise the option of complete withdrawal or if you do not exercise any option within the thirty days' notice period, we will terminate the policy and pay the fund value; and the insurance benefits would cease. Fund value as on date of intimation of withdrawal or on expiry of thirty days notice period, whichever is earlier is payable.
3. Convert the policy into a paid-up policy: If you choose to exercise this option, your death sum assured will be revised to a paid-up sum assured.

$$\text{Paid-up sum assured} = \text{Death Sum Assured} \times \frac{\text{Total number of premiums paid}}{\text{Total number of premiums payable}}$$

At the beginning of each policy month we will estimate the fund value at the end of the month after deducting all prospective charges. If the estimated fund value is less than one annual regular premium, we will immediately terminate the policy and pay the fund value, subject to a minimum value of one annual premium.

The policy will remain in force and the fund value will continue to be part of the segregated funds chosen, till the policy owner exercises his option, or till the expiry of thirty days notice period from the date of receipt of the notice whichever is earlier.

Discontinuing premiums within five policy years:

In the first five policy years, if you - the policy owner, fail to pay your premium within the grace period of fifteen days for policies with monthly mode and thirty days for policies with annual mode from the due date, we will send a notice within a period of fifteen days from the date of expiry of the grace period. You are entitled to exercise within a period of thirty days from the receipt of such notice, the option of:

1. Revival of the policy within a period of two years by payment of all due premiums: If you take this option, the insurance benefits along with the investment made in the segregated funds less applicable charges, shall be continued, subject to meeting our underwriting guidelines. We will recover the outstanding policy administration charge and premium allocation charge. We will add back the discontinuance charges deducted, to the fund value and allot units of the segregated funds chosen at the NAV as on the date of revival.
2. Complete withdrawal of the policy: If you choose to exercise this option or do not exercise any option within the thirty days' notice period, we will credit the fund value less the discontinuance charge, to the discontinued policy fund and the insurance benefits would cease. We will also recover the fund management charge levied on the discontinued policy fund after ensuring the guaranteed return. At the end of the lock-in period of five policy years we will terminate the policy and refund proceeds of the discontinued policy. In case the policy owner exercises the option of complete withdrawal, the policy cannot be revived.

The policy will remain in force and the fund value will continue to be part of the segregated funds chosen, till the policy owner exercises his option, or till the expiry of thirty days' notice period from the date of receipt of the notice, whichever is earlier.

For policies which have not completed two years revival period at the end of the lock-in period

If policy owner exercises option (1) or (3) mentioned above, the fund value will continue to remain in the discontinued policy fund till the policy is revived or upto the end of the revival period whichever is earlier. If the policy is not revived within two years of the revival period, the proceeds of the discontinued policy fund will be paid out to the policy owner.
